    a. Bastion Host

3. Azure Cloud Connectivity

    a. Use Case Overview

    b. Mobile User to Cloud Application Connectivity

    c. Branch Application to Cloud Application Connectivity

    d. Bastion Host

    e. Accessing Azure Stack

4. Google Cloud Connectivity

    a. Getting Started Guide

5. Oracle Cloud

    a. Getting Started Guide

    b. Import Oracle Cloud Public Image

6. VCPE

    a. CPE Automation

  b. CPE Automation Supplement

  c. Super Micro

Supported HyperVisor Providers

1. Hyper-V

  a. Getting Started Guide

2. KVM

  a. Getting Started Guide

3. VMware

  a. Getting Started Guide

4. VirtualBox

  a. Getting Started Guide

> **Note**
>
> Regardless of where Applications Users are trying to reach reside, NetFoundry (NF) Network Fabric needs to be provisioned and deployed first. Navigate to NetFoundry/NF Fabric to find more information on how to stand up the NF Network Fabric.
